

REUSABLE PROTECTIVE FACE SHIELD

In support of the Danish healthcare system, Idé-Pro has developed and initiated the production of a reusable face shield.

The face shield is to be used as a protective measure against COVID-19. We are able to scale up shield production in order to protect as many people as possible against the virus.

The shield consists of a green visor, a rear-mounted rubber band that remains securely in place, and a detachable and easily-cleanable transparent sheeting.

Contact

If you are in need of face shields, please contact Annette Nors at an@ide-pro.dk.

Product Specifications

- MOQ 60 pcs. - one box

Technical information

- Visor: PP Nature (food grade material)
- Transparent sheeting:
